OVERVIEW

ARRO by Powerzone is a one of kind relative humidity controller, what makes it truly unique from other existing products is the fact that it is energy efficient and operated through step controlling mechanism.

ARRO has inbuilt safety interlocks such as AHU, Temperature and humidity interlocks to ensure utmost safety.

ARRO is compatible with BMS and can be used as panel mount.

ARRO communicates with Building Management System through controller modbus protocol, facilitating the users to read, write and change values as well as fetch real time values.

Being a smart PID controller, ARRO is capable of performing the process efficiently.

PRODUCT FEATURES

Energy Efficient

BMS Compatible

Safety Interlocks

Step Control Operation

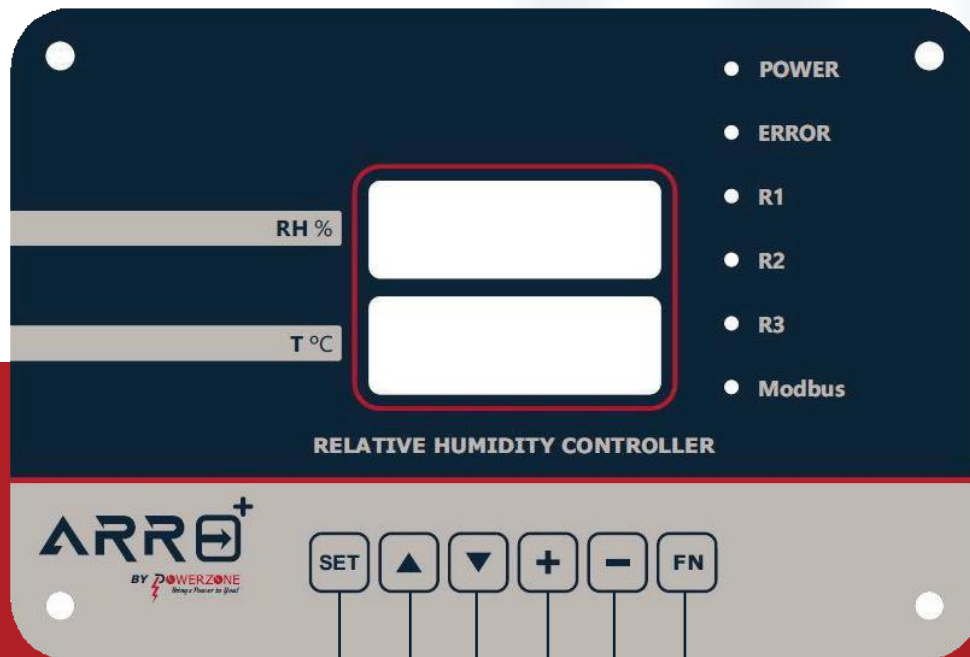

3 Layer Protection

Smart PID Controller
